

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Withdrawn-Currently Amended) A cosmetic product for making up and/or caring for the lips comprising an anhydrous film, the film comprising at least one layer composed of a matrix based on a water-soluble polymer in which is included a coloring ~~agent,~~ agent.

2. (Previously Presented) The method of claim 20, wherein the polymer is selected from the group consisting of protein type polymers; chitin derived polymers; chitosan derived polymers; polysaccharide polymers; acrylic polymers or copolymers; vinyl polymers; copolymers of vinylpyrrolidone and of caprolactam; and blends thereof.

3. (Previously Presented) The method of claim 20, wherein the coloring agent is selected from the group consisting of water-soluble dyes, pigments and mixtures thereof.

4. (Previously Presented) The method of claim 20, wherein the coloring agent comprises at least one water-soluble coloring agent.

5. (Currently Amended) The method of claim ~~4~~, 3, wherein the water-soluble dye is selected from the group consisting of copper sulfate, iron sulfate, water-soluble sulfopolyesters, rhodamines, natural dyes, carotene, beetroot juice, methylene blue, caramel, the disodium salt of tartrazine, the disodium salt of fuchsin, and mixtures thereof.

6. (Previously Presented) The method of claim 20, wherein the coloring agent comprises at least one pigment.

7. (Previously Presented) The method of claim 6, wherein the pigment is selected from the group consisting of reflecting pigments, goniochromatic pigments, interference pigments, pearlescent pigments, fluorescent pigments, glitter and mixtures thereof.

8. (Previously Presented) The method of claim 20, wherein the coloring agent is present in a content ranging from 0.005 to 20% by weight, with respect to the total weight of said cosmetic product.

9. (Previously Presented) The method of claim 20, wherein the product additionally comprises at least one active compound.

10. (Previously Presented) The method of claim 9, wherein the active compound is water-soluble.

11. (Previously Presented) The method of claim 9, wherein the active compound is a compound having a moisturizing, softening, emollient, healing, regenerating, soothing or antiwrinkle action, a protective action against solar radiation or an action targeted at enhancing blood microcirculation in order to render the lips naturally more colored, in order to increase their volume or in order to smooth their surface.

12. (Previously Presented) The method of claim 9, wherein the active compound is selected from the group consisting of vitamin E and its derivatives, vitamin A and its derivatives, polyunsaturated fatty acids, essential oils, plant extracts, sphingolipids and ceramides, sunscreens, octyl methoxycinnamate, 3-benzophenone or butylmethoxydi-benzoylmethane, retinoic acid and its esters, and mixtures thereof.

13. (Previously Presented) The method of claim 9, wherein the active compound is selected from the group consisting of  $\alpha$ -hydroxy acids, such as lactic acid or glycolic acid, ascorbic acid and its biologically compatible salts, enzymes, components with a tightening effect, hydroxy acids and their salts, hydroxylated polyacids, sucrose and its

derivatives, urea, amino acids, oligopeptides, water-soluble plant extracts, peptide or protein hydrolysates, bacterial ferments, trace elements, hyaluronic acid and its salts, mucopolysaccharides, vitamins B2, B6, H, PP, panthenol, folic acid,  $\beta$ -hydroxy acids, such as acetylsalicylic acid, allantoin, glycyrrhetic acid, kojic acid, hydroquinone, arginine, lysine, proline, serine, flavonoids, ginkgo biloba extracts, and mixtures thereof.

14. (Previously Presented) The method of claim 20, wherein the product is devoid of water-insoluble support layer.

15. (Previously Presented) A method for making up the lips, the method comprising applying, to the lips, a cosmetic product comprising an anhydrous film, the film comprising at least one layer composed of a matrix based on at least one water-soluble polymer in which is included at least one coloring agent, the coloring agent being selected from the group consisting of reflecting pigments, goniochromatic pigments, interference pigments, pearlescent pigments, fluorescent pigments, glitter and mixtures thereof.

16. (Previously Presented) A method for making up the lips, the method comprising applying, to the lips, a cosmetic product comprising:

- an anhydrous film, the film comprising at least one layer composed of a matrix based on at least one water-soluble polymer in which is included at least one coloring agent, and

- an active compound having a softening, healing, regenerating or soothing action or an action targeted at enhancing blood microcirculation in order to render the lips naturally more colored, in order to increase their volume or in order to smooth their surface.

17. (Previously Presented) A method for making up the lips, the method comprising applying, to the lips, a cosmetic product comprising:

- an anhydrous film, the film being formed of at least one layer composed of a matrix based on at least one water-soluble polymer in which is included at least one

coloring agent, and

- at least one active compound selected from the group consisting of polyunsaturated fatty acids, sphingolipids and ceramides, octyl methoxycinnamate, retinoic acid and its esters, and mixtures thereof.

18. (Previously Presented) A method for making up the lips, the method comprising applying, to the lips, a cosmetic product comprising:

- an anhydrous film, the film being formed of at least one layer composed of a matrix based on at least one water-soluble polymer in which is included at least one coloring agent, and

- at least one active compound selected from the group consisting of glycolic acid, enzymes, components with a tightening effect, hydroxy acids and their salts, hydroxylated polyacids, amino acids, oligopeptides, peptide or protein hydrolysates, bacterial ferments, trace elements, hyaluronic acid and its salts, mucopolysaccharides, vitamins B2, B6, H, PP, panthenol, folic acid,  $\beta$ -hydroxy acids, such as acetylsalicylic acid, allantoin, glycyrrhetic acid, kojic acid, arginine, lysine, proline, serine, flavonoids, ginkgo biloba extracts, and mixtures thereof.

19. (Previously Presented) The method of claim 15, wherein the cosmetic product is devoid of a water-insoluble support layer.

20. (Previously Presented) A method for making up the lips, the method comprising applying, to the lips, a cosmetic product comprising an anhydrous film, the film comprising at least one layer composed of a matrix based on a water-soluble polymer in which is included at least one coloring agent;

and dissolving the product by the action of saliva and rubbing of the lips against one another or the pressure of a finger.

21. (New) The method of claim 20, wherein the cosmetic product is applied to the lips in the form of a film and the entire film is applied.
